

Lab-6

Xampp Installation

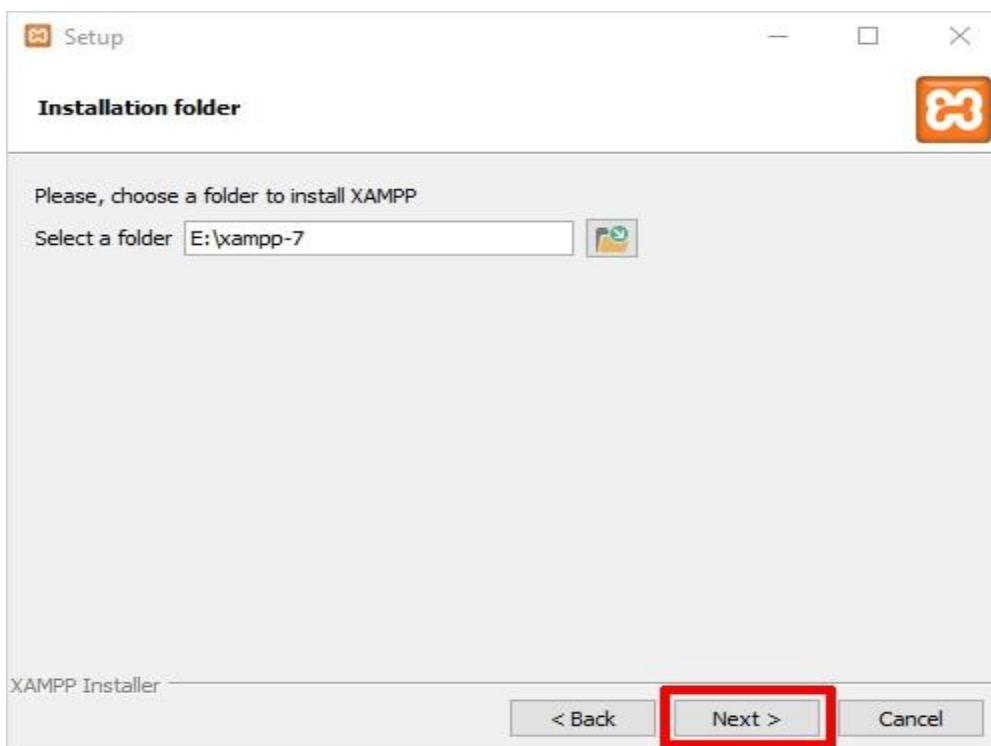

1. Download and install Xampp ([click here](#) to download)
2. Xampp Setup Wizard. The "Setup" window will appear on the screen. Then, click on the "Next" button.

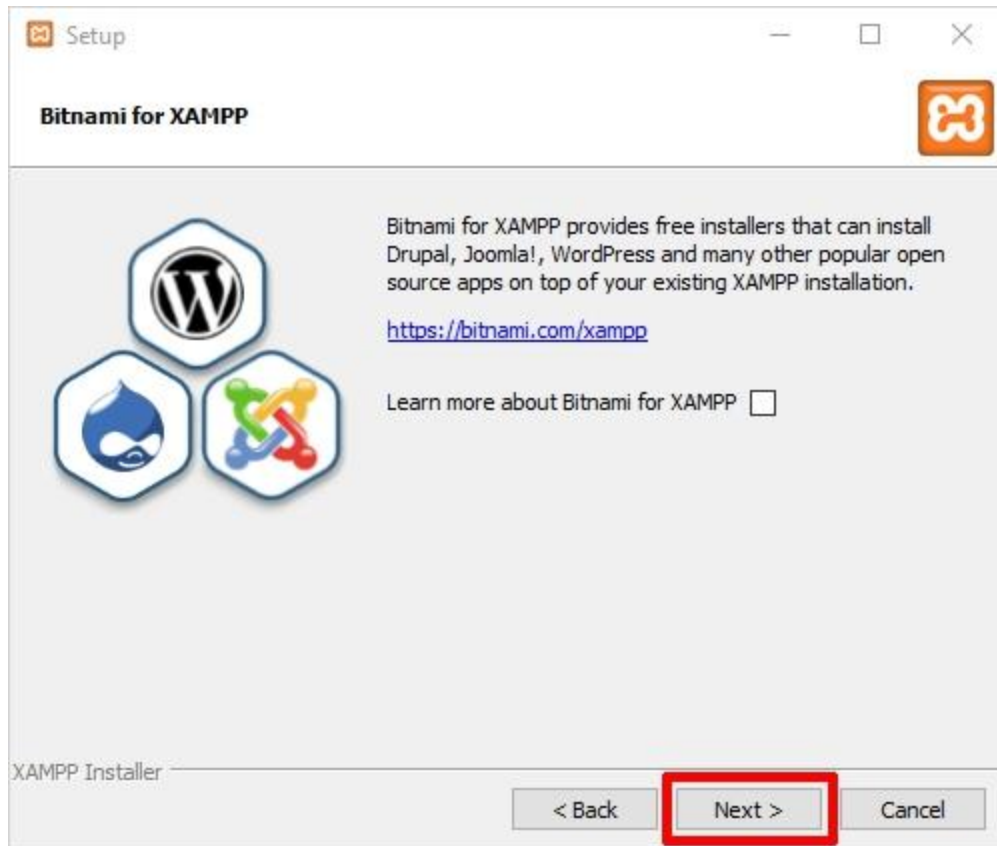

3. Select Components. Select the components that you want to install and click on the "Next" button.

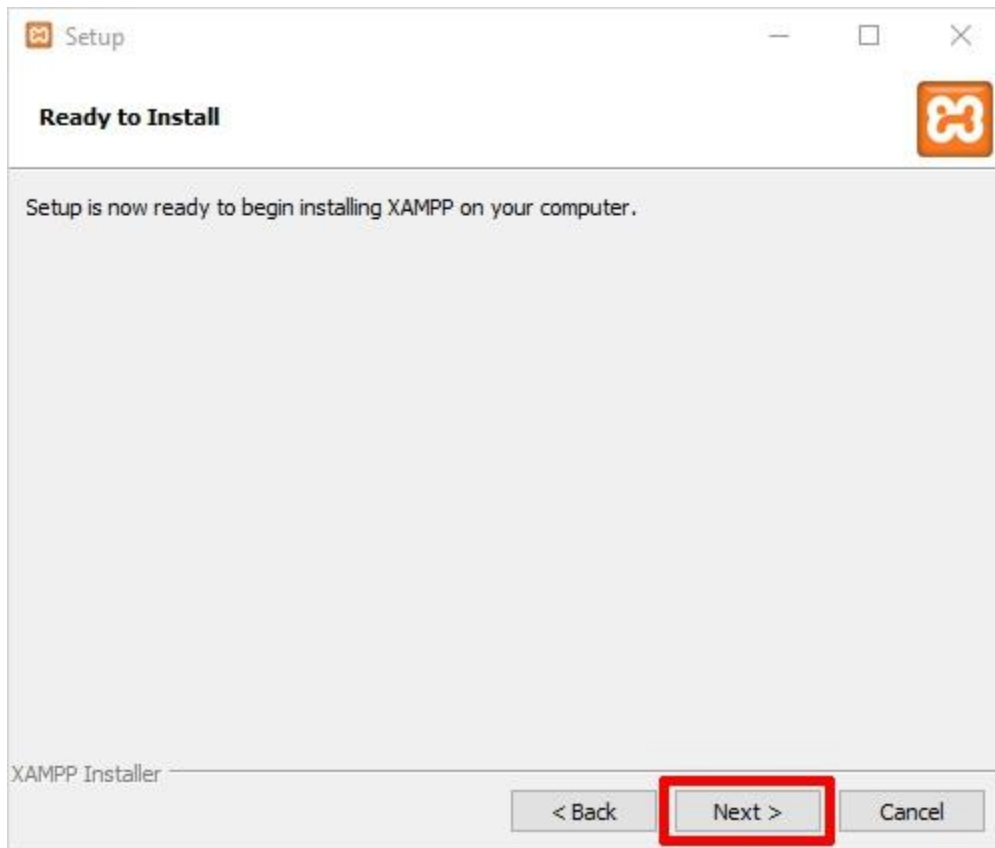

4. Select Installation Folder. Choose a folder to install the XAMPP and click on the "Next" button.

5. Uncheck the "Learn more about Bitnami for XAMPP" option and click on the "Next" button.

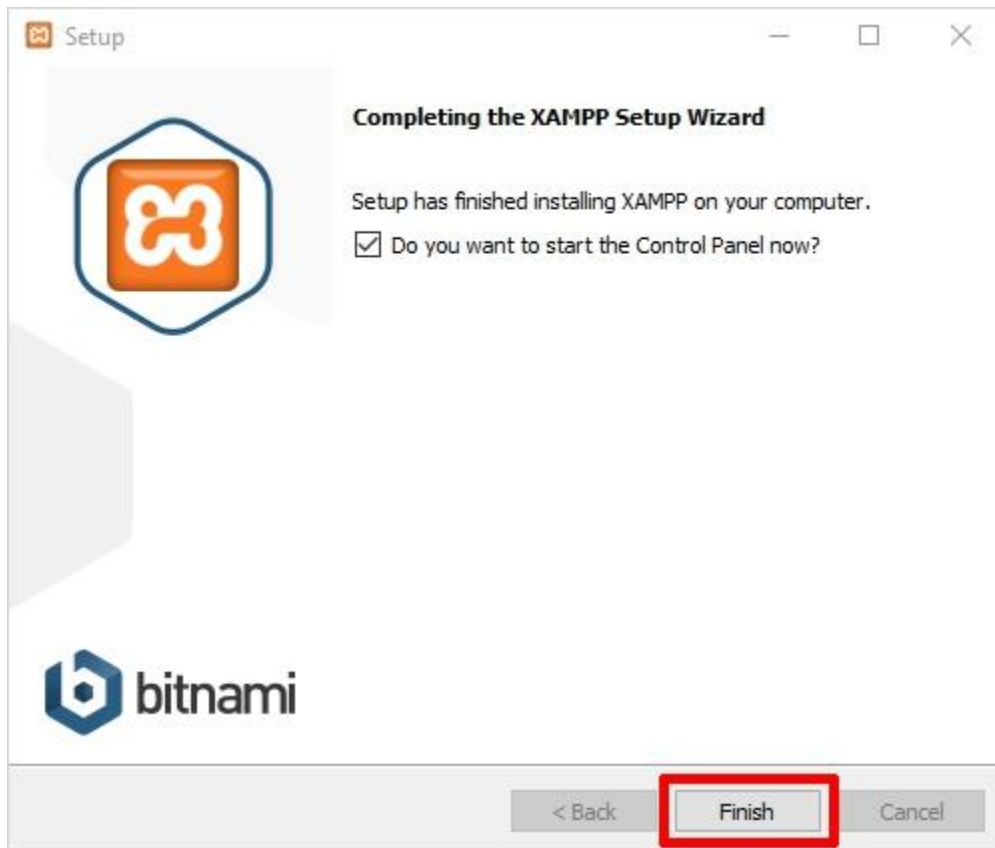

6. "Ready to Install" window will appear on the screen, then click on the "Next" button.

7. Now just be patient and wait for the installation to complete.

8. Click on the "Finish" button.

9. Select a language. (either English or German) and click on the "Save" button.

10. Start the XAMPP control panel through the "Run as administrator" option." XAMPP Control Panel" will appear on the screen and click on the "Start" action to start the

"Apache" and "MySQL" modules.
